Poland, Lublin/Warsaw

## About Me

Motivated and detail-oriented Junior Software Engineer with a solid foundation in Java and a passion for both backend development and test automation. Experienced in building and testing web applications using tools like JUnit, TestNG, Selenium, REST Assured, and Postman. Familiar with Git, Docker, and SQL, and comfortable working in Agile teams. Committed to continuous learning and eager to contribute to reliable, high-quality software projects.

## Experience

### Automation QA Engineer Intern (Java)

12.2024 - 06.2025

Grid Dynamics

As an Automation QA Engineer Intern, I have been responsible for developing and maintaining automated test scripts using Java, Selenium, JUnit, and TestNG. I have also worked on API testing with Postman and REST Assured, ensuring the quality and reliability of software products. My tasks included designing test plans, creating test cases and checklists, and participating in defect tracking. I actively collaborated with colleagues in teams. Additionally, I gained practical experience with Git, SQL and Docker. Throughout the internship, I have applied clean code and TDD principles and continuously improved my knowledge of test automation and backend development.

## Projects

### Android Application for Identifying Instruments – Academic Project (2024)

[github.com/laura-w/InstrumentFinder](https://github.com/laura-w/InstrumentFinder)

Mobile application in Kotlin designed to identify musical instruments from recorded sounds using a machine learning algorithm hosted on a Python server. It is integrated with a server that processes audio files using machine learning. This project was developed as part of my master's thesis.

**Technologies used:** Kotlin, Python, Flask

### Social Network Application – Academic Project (2023)

[github.com/SpringSummerSN/Social-Network](https://github.com/SpringSummerSN/Social-Network)

A collaborative project to create a social networking site. Worked as part of a team to develop the application using Java, Spring Boot, and REST API. Developed functionality for users to manage posts, functionality to register users and created various RESTful endpoints. Conducted code reviews.

**Technologies used:** Java, Spring Boot, Spring Security, REST API, JUnit, MySQL, Git, Swagger, Jira

## Education

10.2022 - 06.2024

Marie Curie-Skłodowska University Lublin

**Master's degree in Computer Science,**  
**specialization in Software Development**

10.2018 - 09.2021

Marie Curie-Skłodowska University Lublin

**Bachelor of Mathematics,**  
**specialization in Computer Mathematics**

## Courses

2025

GCP Cloud Digital Leader - Google Cloud

2022

Junior Java Ready

The course gave me a strong foundation in Java and key technologies like Spring, Hibernate, and Git, while also teaching best development practices and improving my coding and teamwork skills.

## Tech Skills

- Java, SQL
- JUnit, TestNG
- Selenium WebDriver, Cucumber
- Postman, REST Assured
- Maven, Gradle
- Git, Jenkins
- Docker
- Spring Boot, Hibernate
- Bash
- IntelliJ IDEA
- TDD, Clean Code

## Soft Skills

- Analytical thinking
- Problem-solving
- Strong attention to detail
- Effective team collaboration
- Fast learner and self-motivated
- Good time management

## Languages

- **English** - intermediate level (B2) allowing for communication and reading documentation
- **Polish** - native
